

WK3-MotionGraphics

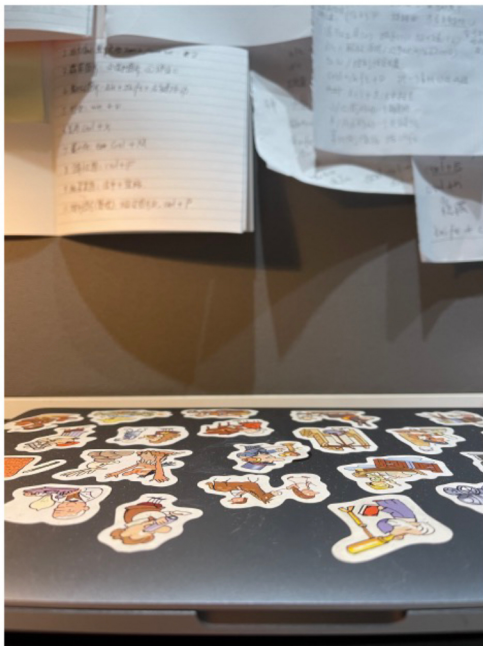

- Idea of the small motion graphic:
I used the character which I designed in the first week. This week help me to further understand the character and how it become vivic with animation. At first, I imagined the things or movement that fit to the personality of the charater. Than, Because it is the first time I use AE, so I decided to let her just jumping from stacked food, this is because her job is a chief.

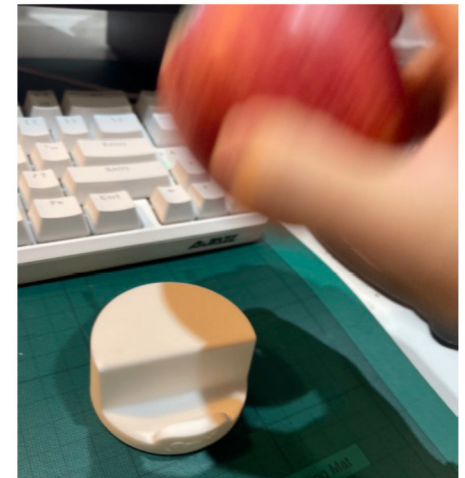

- Storyboard
This is telling the character is falling to the ground, and be hitted by her pot.

- I seperate my character into different parts in the procreate.

- Sound
I did the sound effect by myself, I found it is really interesting.

- Background :These are the scene in my own room
